Vol. 89 No. 1

Obituary v
Adsorption of natural organic matter onto goethite
G.McD. Day, B.T. Hart, I.D. McKelvie and R. Beckett (Melbourne, Vic., Australia) 1
Influence of protein adsorption on flow resistance of microfiltration membrane
E. Iritani, S. Tachi and T. Murase (Nagoya, Japan) 15
Surface analysis of model latex particles
F. Dobler (Aubervilliers, France), S. Affrossman (Glasgow, UK) and Y. Holl (Strasbourg, France) 23
Studies on Nafion membrane with 7-amino-4-methylcoumarin (C120) and tris(2,2′-bipyridyl)ruthenium(II) $[Ru(bpy)_3^{2+}]$ donor–quencher pair: binding and emission aspects
J.T. Kunjappu (Bombay, India) 37
Analysis of particle uptake by cells: binding to several receptors, equilibration time, endocytosis
S. Nir and R. Peled (Rehovot, Israel) and K.-D. Lee (Boston, MA, USA) 45
Interactions between carboxymethyl cellulose and cationic surfactants. 1. Phase equilibria and surface tensions
M. Barck and P. Stenius (Espoo, Finland) 59

Brief Note
Xanthate chemisorption on lead sulfide
A.N. Buckley (North Ryde, N.S.W., Australia) and R. Woods (Port Melbourne, Vic., Australia) 71

Book Reviews 77

Vol. 89 Nos. 2/3

Special Issue: A collection of papers presented at the symposium on Wetting and Interfacial Phenomena organized as part of the 67th Colloid and Surface Science Symposium at the University of Toronto, June 21–23, 1993.

Preface iii
A model for the spreading of thick liquid films on solid surfaces
M.C. Williams and D.W. Fuerstenau (Berkeley, CA, USA) 79
Mechanical and thermal effects in the forced spreading of a liquid film with a finite contact angle
P.C. Wayner, Jr. (Troy, NY, USA) 89
On dewetting conditions
V.S. Mitlin (Austin, TX, USA) 97
Surface and interfacial dissociation constants: apparent vs. absolute
P.D. Cratin (Mt. Pleasant, MI, USA) 103

0927-7757/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

Contact angle for a sessile drop: a statistical mechanical approach
J. De Coninck (Mons, Belgium) 109
A computer model for wetting hysteresis. 1. A virtual wetting balance
A.D. Mahale and S.P. Wesson (Princeton, NJ, USA) 117
A computer model for wetting hysteresis. 2. A virtual wettability scanning balance
S.P. Wesson, Y.K. Kamath and A.D. Mahale (Princeton, NJ, USA) 133
The molecular structure of autophobed monolayers and precursing films of a cationic surfactant on the silicon oxide/silicon surface
W.R. Birch, M.A. Knewtson, S. Garoff and R.M. Suter (Pittsburgh, PA, USA) and S. Satija (Gaithersburg, MD, USA) 145
Wettability: thermodynamic relationships between vapour adsorption and wetting
L.J.M. Schlangen, L.K. Koopal, M.A. Cohen Stuart and J. Lyklema (Wageningen, The Netherlands) 157
Pressure dependence of interfacial tension of hydrocarbon–water systems using axisymmetric drop shape analysis
S.S. Susnar (Toronto, Ont., Canada), H.A. Hamza (Devon, Alta., Canada) and A.W. Neumann (Toronto, Ont., Canada) 169
Fowkes' surface tension component approach revisited
D.Y. Kwok (Toronto, Ont., Canada), D. Li (Edmonton, Alta., Canada) and A.W. Neumann (Toronto, Ont., Canada) 181
The recedence of thick aqueous films in the dewetting of solid surfaces
D.W. Fuerstenau and M.C. Williams (Berkeley, CA, USA) 193
The effect of non-equilibrium adsorption at the solid–vapor interface on the recedence of aqueous films and dewetting of solid surfaces
D.W. Fuerstenau and M.C. Williams (Berkeley, CA, USA) 205
A diffusion approach for modelling penetration of aqueous liquids into paper
J.F. Oliver (Mississauga, Ont., Canada), L. Agbezuge (Webster, NY, USA) and K. Woodcock (Mississauga, Ont., Canada) 213
Diffusive growth of phase-separating domains near a surface: the effect of reduced dimensionality
F.E. Torres (Mississauga, Ont., Canada) and S.M. Troian (Princeton, NJ, USA) 227
Linkage between ζ-potential and electron donicity of charged polar surfaces. 1. Implications for the mechanism of flocculation of particle suspensions with plurivalent counterions
W. Wu, R.F. Giese, Jr., and C.J. van Oss (Buffalo, NY, USA) 241
Linkage between ζ-potential and electron donicity of charged polar surfaces. 2. Repeptization of flocculation caused by plurivalent counterions by means of complexing agents
W. Wu, R.F. Giese, Jr., and C.J. van Oss (Buffalo, NY, USA) 253
Effect of chain termination chemistry and molecular weight on dynamic wetting of polymer liquids
K.R. Willson and S. Garoff (Pittsburgh, PA, USA) 263
Effects of surface rigidity of acrylic polymers and their mixtures on wetting and dewetting
J.B. Huang and R.M. Goodman (Carlstadt, NJ, USA) 269
Stabilization of alumina suspensions in aqueous and non-aqueous media by a hydrophobically modified polymer
X. Yu and P. Somasundaran (New York, NY, USA) 277
Surface exchange of polymer amphiphiles
E. Kumacheva and J. Klein (Rehovot, Israel), P. Pincus (Santa Barbara, CA, USA) and L.J. Fetters (Annandale, NJ, USA) 283
